

Premium Service

Direct from the manufacturer. Installation, training, and maintenance for your Güdel products.

With product-related Güdel services, you ensure a professional start and reliable operation of your application. From professional installation and commissioning with supervision through training courses, inspections and maintenance, you receive services tailored to your product, application and operating environment. This reduces risks during implementation, relieves your team and systematically builds in-house know-how. At the same time, you protect availability, value retention and service life of your Güdel products and improve planning for effort, service interventions and costs across the entire lifecycle.

Benefits

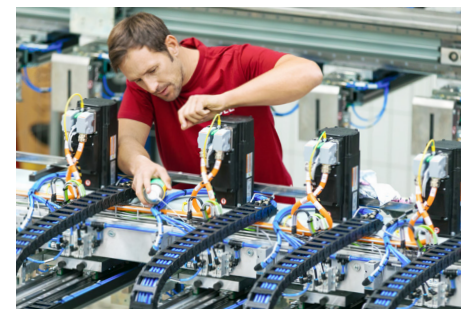

- First-hand manufacturer expertise
- Safe and professional implementation

automation on track

Güdel is an internationally active Swiss industrial company founded in 1954. As one of the world's leading suppliers of industrial automation solutions, Güdel offers its customers everything from a single source: from high-precision machine components to customized automation solutions for use in markets such as automotive, aerospace, railway, logistics, composites and machine tools.

Güdel technology is characterized by innovation, modularity, and quality. Worldwide, Güdel employs around 1,000 people at over 20 locations. Since its foundation, the company group has been owned by the founding family.
